## Upgraded Features and Ease of Use

### Smart Function Key (Top Key) Universal Design

#### Visual Ringer and Multi-Function Key on Top of Handset

The Smart Function Key (Top Key) on the top of the handset flashes according to the situation. This provides an entirely new level of easy use.

### 1.8" LCD, Amber Backlight Universal Design

#### The large LCD screen

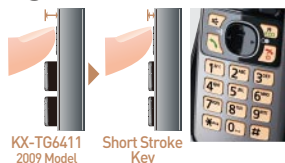

The large, backlit 1.8-inch screen is easy-to-read, and the simple menu screen lets you access functions without confusion.

### Short Stroke Key Unique Technology

#### Keys Have a Positive Pressing Feel, and a Good Design

The keys do not protrude far from the handset, so they require only a gentle press and have a positive feel. They also give the handset an attractive appearance.

### Clear Sound Unique Technology

#### Even in the Backyard or Garage

High-precision error correction system ensures clear conversation with less voice interruptions, allowing you to enjoy a smooth, error-free conversation even when you're out in the backyard or garage, far away from the base unit.

### Power Back-Up Operation\* Unique Technology

#### Handset Usable at Ease Even When Power Is Out

Because the base unit has a built-in battery, the user can continue talking from the cordless handset without any signal interruption for about 1 minute after a power outage. After that, the user can place a handset on the base unit and switch it to supply power from the handset. The user can then continue talking over the speakerphone or from a separate handset.

\* Please note that this system is not available in some countries.

### Advanced Alarm Clock Unique Technology

#### Upgraded Memo Alarm

There is no need for a separate alarm clock, because the alarm function lets you set a different wake-up time for each day, and the Snooze function sounds the alarm every 5 minutes.

### One Touch Eco Mode Ecology

#### One Touch Eco Modes Let You Lower the Power Consumption

Easy to turn on eco mode by one touch pressing the eco button on the handset. In eco mode, the signal output is reduced by 90%\*.

\* Compared to the normal mode

### Bundle Models
